

Gas Field Services

Occupational Health and Safety Policy

Gas Field Services (GFS) is a privately-owned technical services contracting company based in Central Queensland. Our primary activities are coal seam gas drilling and well servicing, and we operate in the nearby Bowen Basin as well as the Hunter Valley, New South Wales.

Gas Field Services aims to conduct all of its activities in accordance with OHS legislation and other legislation and requirements, but also to demonstrate its commitment in protecting employees, contractors, visitors, customers and the general public from injury and illness resulting from the company's activities through implementation of a safety management system complying with AS/NZS 4801:2001 with a goal of:

NO HARM

We will achieve this through the adoption of the following objectives:

- Providing and maintaining healthy and safe workplaces, plant and systems of work
- Requiring compliance with documented procedures for consistent safe and efficient operating outcomes
- Informing and training employees to recognised standards
- Involving employees in consultation on safety issues
- Identifying, investigating and rectifying unsafe conditions
- Monitoring employees' health
- Striving for continuous improvement in the safety management system.

Employees also have responsibilities, which include:

- Following all OHS policies and procedures
- Recognising and reporting hazards which may affect the health and safety of themselves or others.

GFS have now implemented a Fully Integrated Management System to QA Standards.

Quality -AS NZS ISO 9001:2008

Safety -AS NZS 4801:2001

Environment -AS NZS ISO 14001:2007

Stephen Burt
